

The Future

Jetool is actively preparing for growth through LEAN operations projects, an introduction of an information/ERP system, recertification to AS9100-D and ISO9001:2015, certification as a Woman Owned Small Business, nurturing of existing & prospective customer relationships, and via a restructuring of the roles and responsibilities of the Jetool team.

Our passion is welding, fabrication, toolmaking, and machining the highest quality parts and we continue to target our niche as an Aerospace GSE and MRO tool, fixture, and instrument contract manufacturer. As we look to the future, we are targeting increased sales from the new and emerging aerospace markets of space and launch. Jetool won a Blanket Purchase Agreement (BPA) (in mid-2020) to offer welding and machining directly to NASA's Goddard Space Flight Center. This coupled with the component manufacture of ATLAS V launch system parts for our Tier 1 customers, is our metaphorical "foot in the door" to Space!

Our value proposition is to deliver complex tools requiring multiple industrial processes while guaranteeing, on time, on budget, and on spec tools. How do we deliver? We offer many in-house services (vertical integration) and have strategic vendor partnerships.

- Machining, EDM, Grinding
- Fabrication, Certified Welding
- Waterjet, Plasma Cutting
- Paint Shop, Plastisol
- Wood Shop
- Assembly
- Packaging
- Quality Inspection
- Vendor Partnerships
- Design Services
- Coatings
- Treatments
- NDT Services
- Logistics

We have a diverse team of men and women of various ages and experience which protects us from many of the concerns of competitor shops who struggle to hire and retain machinists and fabricators. We credit a collaborative hiring and apprenticeship program, and strong company culture that is defined by shared Core Values.

Core Values: Family & Community, Workmanship, Customer Service, Open-mindedness, Growth and Integrity.

We hire, reward, and fire, make business decisions, and take on new customers according to these Core Values.

We participate as members of many communities and various industry groups such as MAMA, AFA, Saginaw Future, local Chamber of Commerce etc. We are constantly improving a vast network of advisors and service providers who can help us navigate the growth we are preparing for and already experiencing.

We challenge you to join our team and to take up our cause! Whether as a customer, vendor, employee, or advisor, we welcome your help. Reach out via Jetool.com to learn more about how you can help write Jetool's future and be a part of our all-American success story!

UP, UP and AWAY!
